<tbody>
<tr>
<td>• 2 hours</td>
<td>• 1 small group project</td>
</tr>
<tr>
<td></td>
<td>• 1 small group field trip report</td>
</tr>
</tbody>
</table>

OBJECTIVES:
The course aims to enhance students’ understanding of the links between environmental protection and economic development, and issues relating to sustainable development.

COURSE SYNOPSIS:
This course evaluates the links between environmental protection and economic development. The world must manage its natural and environmental resources to meet the human needs of the present while at the same time preserving these resources for future generations. The course introduces students to different views on how human society can achieve the goal of economic growth without depleting the Earth’s capital and jeopardizing the planet’s life support system. It aims to enhance students’ understanding of the issues relating to sustainable development. Although the course cannot provide complete answers to the issues, it helps develop students’ ability of critical thinking and suggest promising directions in which answers may be sought.

LECTURE TOPICS:
- Introduction to sustainable development
- Challenges around sustainable development
- Measurements of sustainable development
- Environment: energy
- Environment: climate change
- Environment: water, food, and waste
- Economy: economic development, poverty, inequality, and trade
- Society: environmental justice
- Sustainable urban development
- Actors and actions

*Geography Major Programme Learning Outcomes (PLOs)*

In order to meet the demands and challenges in this dynamic and ever-changing world, the Department has designed a series of well-structured and contemporary courses to cater to the different interests of students. Its courses are designed to align with the University’s educational aims which hope to nurture future generations not only with a critical and intellectual mindset, but also with a passion to contribute to society in general.

After completing the programme, Geography Major students should be able to:

PLO1 critically analyse the geographical aspects of the relationship between people and the natural environment;
PLO2 demonstrate and develop an understanding of how these relationships have changed with space and over time;
PLO3 identify, collect and utilize primary and secondary data to investigate and analyse the issues and problems facing people, places and society;
PLO4 integrate, evaluate and communicate information from a variety of geographical and other sources;
PLO5 participate in promoting social, economic and environmental sustainability at the local, regional and global scales; and
PLO6 effectively apply a range of transferable skills in academic, professional and social settings.
